PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with hands-on experience in Python, SQL, software development, REST APIs, testing, debugging, and data processing. Experienced in developing and integrating software components, implementing application solutions, and troubleshooting technical issues through internships and projects. Familiar with SDLC, Agile practices, Git, technical documentation, and software quality. Additional experience in AI, Generative AI, LLMs, and RAG-based applications.

TECHNICAL SKILLS

Programming: Python, SQL

Software Development: Software Development, Component Development, Component Design, Coding

Testing & Quality: Unit Testing, Testing, Debugging, Validation, Error Handling, Troubleshooting

Integration: REST APIs, API Integration, Data Interfaces, System Integration, FastAPI

Engineering Practices: SDLC, Agile, Technical Documentation, Software Quality, Git, GitHub

Data & AI: Data Processing, Data Analysis, Artificial Intelligence, Generative AI, LLMs, RAG

INTERNSHIPS

AI Engineer Intern

Jan 2026 – Mar 2026

Vrity AI

- Developed Python-based application components using FastAPI and REST APIs to implement solutions for application requirements.
- Built automated workflows using Python, LangChain, LangGraph, RAG, and vector databases by integrating multiple application components.
- Performed testing, debugging, validation, error handling, and troubleshooting to improve application reliability and software quality.
- Collaborated with team members on implementation, issue resolution, documentation, and application improvements using Git and Docker.

AI Intern

Sep 2025 – Nov 2025

Infosys Springboard

- Developed Python-based functionality for automated image processing, prediction, and analysis workflows.
- Performed data preprocessing, feature extraction, testing, validation, and error analysis to improve solution reliability.
- Investigated technical issues, analyzed results, performed debugging, and documented findings during solution development.

PROJECTS

AI Data Analytics Platform

GitHub | Live

Python, SQL, FastAPI, REST APIs, LangChain, Groq API, FAISS

- Developed a software solution using Python and FastAPI to process natural-language requests, execute SQL queries, and generate data-driven insights.
- Integrated REST APIs, SQL, LangChain, Groq API, and FAISS to build data processing, retrieval, and analysis components.
- Implemented data validation, API integration, error handling, and testing to improve application reliability.

AI Document Intelligence and RAG System

GitHub | Live

Python, FastAPI, REST APIs, RAG, LLMs, Vector Database

- Developed a Python-based application for document ingestion, processing, information retrieval, and question answering.
- Integrated FastAPI, REST APIs, RAG, LLMs, and vector databases to implement an end-to-end document intelligence solution.
- Performed testing, debugging, validation, and troubleshooting to improve application functionality and reliability.

EDUCATION

Sri Venkateswara College of Engineering and Technology

2022 – 2026

B.Tech in Information Technology, Chittoor, Andhra Pradesh

CGPA: 8.97/10

CERTIFICATIONS

- Advanced Python** – Programming Hub
- Python and SQL** – ExcelR
- Generative AI** – Prepinsta
