PROFESSIONAL SUMMARY

Recent B.Tech Information Technology graduate with hands-on experience in technology, automation, AI, GenAI, Python, SQL, APIs, and workflow development. Strong analytical and problem-solving skills with a natural interest in identifying opportunities to automate and simplify manual processes. Experienced in researching, experimenting with emerging technologies, developing proof-of-concepts, integrating APIs, and building technology solutions that improve efficiency and solve business problems.

TECHNICAL SKILLS

Programming: Python, SQL

AI & GenAI: Artificial Intelligence, Generative AI, GenAI

Automation: Process Automation, Workflow Automation, Automation Tools

Integration: APIs, REST APIs, API Integration

Data: Data Analysis, Data Processing

Development: Proof-of-Concept Development, Testing, Debugging

Core Skills: Analytical Thinking, Problem Solving, Process Simplification, Business Problem Solving

Technology: HR Technology Concepts, HRMS Concepts

INTERNSHIPS

AI Engineer Intern

Jan 2026 – Mar 2026

Vrityfy AI

- Developed Python-based AI and GenAI applications using FastAPI and REST APIs, converting requirements and business problems into technology solutions and proof-of-concepts.
- Built automated AI workflows using LLMs, LangChain, LangGraph, RAG pipelines, and vector databases to simplify information processing and retrieval tasks.
- Researched and experimented with AI, GenAI, workflow automation, API integrations, and emerging technologies to develop practical automated solutions.
- Integrated APIs and application components while performing testing, debugging, validation, error handling, and troubleshooting to improve workflow reliability.
- Collaborated with technical teams on requirements, issue resolution, documentation, application improvements, and technology implementation using Git and Docker.

AI Intern

Sep 2025 – Nov 2025

Infosys Springboard

- Developed AI-based solutions using Python for automated image processing, prediction, and analysis workflows.
- Performed data preprocessing, feature extraction, testing, validation, experimentation, and error analysis to improve solution reliability.
- Analyzed technical problems, investigated application issues, evaluated results, and documented findings during solution development.

PROJECTS

AI Data Analytics Platform

GitHub | Live

Python, SQL, FastAPI, REST APIs, LangChain, Groq API, FAISS

- Designed and developed an AI-powered technology solution to automate data querying and generate business insights from natural-language requests.
- Integrated Python, SQL, REST APIs, LLMs, LangChain, and FAISS to build automated data processing, retrieval, and analysis workflows.
- Implemented data validation, SQL processing, error handling, and API integration to simplify manual data analysis and improve workflow efficiency.

AI Document Intelligence and RAG System

GitHub | Live

Python, FastAPI, REST APIs, RAG, LLMs, Vector Database

- Developed an AI-powered document intelligence solution to automate document processing, information retrieval, and question-answering workflows.
- Built document ingestion, processing, retrieval, and response-generation workflows using Python, RAG, LLMs, APIs, and vector databases.
- Performed research, experimentation, testing, debugging, validation, and troubleshooting to improve automated workflow reliability and usability.

EDUCATION

Sri Venkateswara College of Engineering and Technology

2022 – 2026

B.Tech in Information Technology, Chittoor, Andhra Pradesh

CGPA: 8.97/10

CERTIFICATIONS

Advanced Python – Programming Hub

Python and SQL – ExcelR

Artificial Intelligence Primer – Infosys Springboard
